THE FLORAL
COLLECTION
Nature making time

No two are alike. Naturally.

Floral begins with a raw copper dial, transformed using carefully controlled verdigris treatment, in our workshops.

The chemistry creates layers of green, blue, russet and exposed copper. Each surface develops differently, making every completed clock genuinely individual.

Flora
TEMPUS

Copper and time transformed.

Copper is a living material. Floral condenses the visual character of decades of natural weathering into an expressive surface, then pairs it with delicate botanical forms and gilded hands.

DIAL 760mm diameter

OTHER SIZES ON REQUEST

A patina with its own character.

The copper face is treated by hand, allowing the verdigris to form in natural, irregular layers. Botanical motifs emerge through the surface and link the material directly to the design.

Ornate gilded hands provide a warm point of contrast, remaining clear against the changing green, blue and russet tones.

Crafted surface. Dependable timekeeping.

Behind the individually patinated copper clock face sits a dependable mains powered clock mechanism, with automatic seasonal changes and correction after a power cut.

SEASONAL TIME CHANGE

Nature's own colour pallet.

The standard clock uses concealed wall brackets, allowing the dial to remain the focus.

For individual projects, we can discuss colour, finish, scale, illumination and mounting requirements, subject to technical review.

NATURAL | EXPRESSIVE | INDIVIDUAL

A numbered work.

Every numbered Floral Collection clock is accompanied by a certificate of authenticity and a discreet engraved brass plaque.

Together they record the design, finish, serial or edition number, date of completion and the people responsible for the piece.

The clock is protected in a purpose made foam lined wooden crate, ready for delivery to its new setting.

MADE TO MARK TIME
AND MADE TO LAST

Time is our passion.
